PROFILE

Creative designer from Brazil, now based in Germany, with 15+ years of experience across graphic design, brand identity, motion, and creative marketing. I've worked in both agency and SaaS/startup environments — from developing global B2B brand systems to collaborating on user interfaces, microinteractions, and product communications.

At companies like parcelLab and Experteer, I partnered with product and development teams to design UI components, email templates, landing pages, and prototypes — always blending **visual storytelling** with **usability and clarity**.

I thrive in fast-paced, cross-functional teams and bring a sharp eye for branding, layout, and motion into everything from marketing campaigns to product experiences.
